

A service provided by

The Neridronate Treatment.

DISCOVER THE PATENTED PROTOCOL DESIGNED FOR CRPS THAT BROUGHT HUNDREDS OF PATIENTS IN REMISSION.

First and foremost, the

FACT

Bisphosphonates and **CRPS**.

*ABSTRACT: Neridronate is an amino-bisphosphonate that has been **officially approved** as a treatment for osteogenesis imperfecta, Paget's disease of bone and **complex regional pain syndrome (CRPS)** in Italy. Neridronate is administered either intravenously or intramuscularly; thus, it represents a valid option for both cases with contraindications to the use of oral bisphosphonates and cases with contraindications or an inability to receive an intravenous administration of these drugs. Furthermore, although the official authorized use of neridronate is limited to only 3 bone diseases, many experimental and clinical studies support the rationale for its use and provide evidence of its effectiveness in other pathologic bone conditions that are characterized by altered bone remodeling.*

Internationally, **Neridronic acid** is the first investigational medicine to receive **Breakthrough Therapy Designation** for the treatment of **CRPS**. It was discovered and developed by Abiogen Pharma SPA, Pisa, Italy, where it was patented and recognized by AIFA as the approved therapy for CRPS.

Before and after pictures of Carole's hand.

Carol was treated for CRPS which affected her left hand causing extreme swelling, pain, burning flares and inability to move the hand. Five months after the treatment, she regained mobility and eventually her hand went perfectly back to normal.

See here incredible testimony at www.crps-treatment.com/truth-for-neridronate

Trial's results

“Neridronate has also been evaluated as a treatment for CRPS-I in a recent large multicentre, randomized, double-blind, placebo-controlled trial. About 82 patients with CRPS-I in either their hand or foot were randomly assigned to receive either an intravenous infusion of 100 mg of neridronate every 3 days for a total of 4 times or the placebo. After 50 days of the last infusion, the placebo group was treated with the same regimen of neridronate. In the double-blind phase, the visual analog scale (VAS) for pain was significantly lower in the neridronate-treated group after 20 days of treatment than in the placebo group and only continued to decrease for the next 20 days in the neridronate group. Oedema, pain induced by passive motion, allodynia, and hyperalgesia were significantly reduced in patients who were treated with neridronate compared with those in patients in the placebo group, and various functional indexes were increased. All neridronate-treated patients and only 45% of the patients who were treated with the placebo discontinued the symptomatic drugs within 2 weeks. The results obtained from patients had previously received the placebo, were subsequently treated with neridronate during the open-extension phase, and were similar to obtained from the neridronate-treated group during the blind phase, as represented by significant reductions in the VAS, oedema, and pain on passive motion; the disappearance of allodynia and hyperalgesia; and an improvement in functional scores after 40 days of follow-up. A complete normalization of the abnormal uptake was reported in patients undergoing bone scintigraphy, and a disappearance of localized bone oedema was observed on MRIs from 12 treated patients”

How does it work?

CRPS Treatment is a Division of **Medical Tourism Italy**.

The process is therefor the same for the general Medical Tourism Italy patient; each online consultation and contact with our Personal Health Planner is completely free of charge, and you'll get all the information you need to plan your therapy trail accordingly to your needs. After you're settled with the kind of package you'd like to book, the hospitality solution that works best for you and all the details about your stay, the only thing you have to take care of on your own is booking the flights. We choose to work this way in the Patient's interest.

We know that getting the best treatment abroad for your condition is expensive, and we want our patients to be able to save as much as possible if they so wish; as the plane fares are something constatly changing, we let our patients choose which airline to get and to which airport to arrive to (Verona, Treviso or Venice). From there on, we'll take care of everything.

The Personal Health Planner will come and pick you up at the Airport, escort you to your Hotel, make sure that everything is up to your liking, drive you wherever you need to go, they will come with you to the therapies and hospital visits and you'll not be left alone; the Personal Health Planner will be your interpreter throughout all your stay and even afterwards for a 6 months Followup included in the price.

For the CRPS Treatment specifically, the procedure is as follow:

- Visit in the Hospital with the CRPS Specialist
- Administering of the I.V. infusions of Neridronate
- Administering if needed of the pain medications
- Rehabilitaiton and Physical Therapy with the designed specialist
- Rest and Recovery
- Tourism with the Personal Health Planner, if you so wish
- Light Therapy with Bioptron technology

What is the Treatment's **Success Rate**?

Depending on how quickly the Treatment is administered after the disease's start point, the success percentage is 95% or higher, depending also on the singular Patient's History with Chronic Pain. If CRPS has been running since more than 4 years, however, there still will be a remarkable improvement of the quality of life of the Patient, but the chances of getting to full remission might be compromised. The patient will still get a partial remission, being able to go back to a lifestyle which is not merely centered on the pain management. Most of our patients have been able to go back to work, doing house chores, driving, swimming, writing and all those activities part of the ordinary life they missed.

Your Personal Health Planner!

The Personal Health Planner is our Company's core asset; an experienced, empathic consultant that will be in charge of your Treatment Plan. This grants you the advantage in handling your health in a unique way, with a dedicated and 24/7 focus on your best interest only, selecting and tailoring your therapeutic path to reach the best outcome for your specific case. This is where **traditional healthcare tends to fail**. When you find the right medic, you are more than likely to be left alone afterwards in discovering how much additional care and therapy is needed for a full recovery. That's how we're different. We are interested in delivering **full recovery**, customized on your story and needs.

Allowing your body to heal.

For a successful healing, especially when the Nervous System and reumatic pathologies are involved, it is extremely important not feel stressed. It has been shown through scientific research how **stress can** weaken the immune system and **slow down recovery**, if not completely empare it. That's why Medical Tourism Italy also take care of all the particularities of your journey and stay, from the small details, to the most important bureaucratic process handling. You can choose among several Hotel classes equipped with the latest technologies and comforts, specifically designed for patients and people dealing with Chronic Pain or Recovery Time. We also believe in the Mind over Body approach and we provide several possibilities to enjoy a revolutionary concept of Tourism, based on experiences that will allow you to explore the Italian culture your own way, at your own pace.

**Extinguishing CRPS Pain.
One drop at a time.**

Why are Social Media so important for us?

The main reason why we ask our Patients to sign a privacy release form, is that we have very limited means to distribute the informations across the web. We don't want to start aggressive and targeted advertising campaigns; that would blur our goal which is not to simply convert sales, but to actually help people. That's why our online consulting is always free of charge. We know how much Warriors have found great use and comfort from

the Communities online, and we would prefer Warriors to use their own voices, tell their own stories, let their brothers and sisters know what's the truth about Medical Tourism Italy and what were we trying to achieve here. We strive to be always present online and be available for you at any time, even out of business hours; to us, also this means having a 100% Patient Centered Approach.

We are

A Patient - Health Planner bond

Crossing the Oceans or the country to get the Treatment you need can be very scary. That is also why the Personal Health Planner is one of our main asset. It's a completely new kind of figure, designed as a job role especially for accomplishing our mission. We selected as Personal Health Planners only extremely emphatic people, completely and reliably bilingual, who have been specifically trained to be able to assist the Patient in a 360° spectrum of needs and expectations. At first it might feel awkward or very new, the idea of having a person you don't know yet who will always be by your side. Instead, we have witnessed how the bond between

the Patients and their Personal Health Planners is something truly honest and incredibly powerful, leading the patient towards a greater degree of confidence and relaxation, which are fundamental part of healing and recovery. That is also why being a big Community is so important to us, as it is almost like being a big family. With this idea in mind, we have created the **CRPS, Neridronate Treatment Italy: Support Group**. With its growing number it's counting in August 2019 more than 900 members, and it's were our past Patients and new one can share their experiences and stay in touch.

9

a big Community

Facebook Page and Group

You can find our Facebook Group under this name: CRPS, Neridronate Treatment Italy: Support Group. Alternatively, if you wish to reach our official CRPS Treatment page, you can find it at www.facebook.com/CRPSTreatmentnet

Instagram Page

TOURISTIC POSSIBILITIES

Italy is full of great wonders: discover its hidden gems and taste its delicacies with your Personal Health Planner!

NO FRILLS

International bureaucracy can be difficult to deal with and cause serious headaches. We have it all covered for you, with no Frills.

More Scientific Data o

n Neridronate for CRPS

“Clinical case: A 23 years old man, from Pakistan, was admitted to our medical division with a 6 months history of left foot **pain resistant to analgesics**, causing inability to move and a previous hospital admission. Patient’s clinical history was unremarkable except for a 9 months earlier scvooter fall with left foot traumatism.

Just from the beginning, the pain seemed disproportionate in time and degree to anamnestic event and clinical-instrumental findings. Physical exam showed allodynia, darkening skin and trophic changes of the foot. Blood tests for inflammatory or autoimmunity markers were negative. X-rays excluded fractures. US showed edema of subcutaneous tissue, which was confirmed with a foot MRI. On this basis, assuming a case of algodistrophy, a triplephase bone scintigraphy was performed with evidence of minor radio-tracer uptake in corrspondence of localized patchy left foot’s bone.

After a diagnosis of **algodistrophy**, a combined therapy with painkillers and neridronate (a biphosphonate) was started. This allowed initial **improvement** and the **discharge** of the patient.”

From the **Italian Journal of Medicine**, available at **www.crpsneridronate.com**

More than 12 influential Scientific Research studies available

On our specifically designed page “www.crpsneridronate.com” you can find more than 12 external links to official Medical Journals and researches from several Scientific Sources that we have gathered for you. Here you’ll be able to see how Neridronate has been proven by many European studies to be the treatment of election for CRPS / RSD / Algodistrophy.

Italy is at the moment the only Country able to deliver effective application of the Therapy including not simply the infusions, but all the side therapies and the patient care needed to aim to the goal, a dramatic change in the quality of life if remission is not achiavable.

Get in touch with a Personal Health Planner today to start your journey back to a normal life.

Maecie, one of our patients and many success cases.

We are a Community
